**Specification of LG Viatera**

Standard Size : 20mm(T) x 1,400mm(W) x 3,000mm(L), 2100kg)

Jumbo Size : 20mm(T) x 1,600mm(W) x 3,200mm(L), 2560kg)

> The pattern that starts with RO(Royal) code in the product is operated
  as a jumbo-sized slab (Except RO10B-Mandalay Bay)

🐾 For floors    🐾 For walls    🐾 For countertops

**1. Size of Royal Line**

- The products of the Royal line have only one standard size.
- The size is 20mm(T) × 1,600mm(W) × 3,200mm(L)
  However, for an exception, the products of RO10B (Mandalay Bay) have the size of
  20mm(T) × 1,400mm(W) × 3,000mm(L)

**2. Design / Pattern**

RO(Royal) code products are basically designed with large vein.
Therefore, there may be a phenomenon where the pattern appears to be broken
if the slabs are installed together. (e.g. top-top, top-wall, top-front etc.)
This is a natural situation and is not subject to claim compensation.
